PROFESSIONAL SUMMARY

Game Programmer with 8 years of experience in game development, including 3 years as a professional Unity Developer. Skilled in C# scripting and gameplay systems programming across PC, Android, and browser (HTML5/WebGL) platforms, with a strong foundation in math and physics for games. Experience spans rogue-like, tower defense, card, puzzle, shooter, and educational game genres. A dedicated team player who enjoys collaborating with others, learning new technologies, and contributing to high-quality game experiences.

CORE SKILLS

- Game Engines & Tools: Unity, Cocos Creator, Phaser 3, CoreIDRAW
- Programming: C#, JavaScript, Object-Oriented Programming, Gameplay Systems Programming
- Platforms: PC, Android, WebGL/HTML5, VR, Kinect
- Game Development: Game Design, UI/UX Implementation, Multiplayer Systems, Math & Physics for Games
- Collaboration: Team Work, Problem Solving, Time Management, Adaptability

WORK EXPERIENCE

Unity Developer - Nusameta *Feb 2024 - Present*

- Develop and maintain gameplay features and systems using Unity and C#.
- Collaborate with cross-functional teams to plan, build, and ship game features.

Junior Game Programmer - Miracle Gates *Nov 2022 - Jan 2024*

- Programmed gameplay mechanics and systems for multiple Unity game titles.
- Contributed across the full development cycle, from prototyping through release.

Unity Game Programmer (Freelance) - Self-Employed *Jan 2022 - Oct 2022*

- Delivered Unity-based game programming services for independent client projects.

Junior Game Programmer - Own Games *Sep 2021 - Dec 2021*

- Programmed and prototyped original game concepts independently.

Junior Game Programmer - Lentera Studio *Feb 2021 - May 2021*

- Supported gameplay programming tasks within an established Unity development team.

SELECTED PROJECTS

- Financial Fighter (2025) - Rogue-like card strategy game; PC & browser.
- Super Duper Space Wizard (2025) - Typing-based casual action game; PC & browser.
- Heroes of Indonesia (2020) - Turn-based card game, Android.

Full list of all 22 projects on the next page.

EDUCATION

Game Design - STMM MMTC Yogyakarta (2016 - 2020)

LANGUAGES

- Indonesian - Native
- English - Intermediate

FULL PROJECT LIST (22 PROJECTS, 2017-2025)

- Financial Fighter (2025) - Programmer, PC & Browser. A chaotic rogue-like card strategy game where you deploy quirky workers and chain powerful synergies to rescue your company from financial ruin.
- Super Duper Space Wizard (2025) - Programmer, PC & Browser. A retro-style wizard battle game.
- Spirit of Weapon (2022) - Programmer, Android. A Plant-vs-Zombie-alike tower defense game.
- Game Anak (2022) - Programmer, Android. An educational kids game — a snake-and-ladders-alike board game where the target is to be the first to reach the finish line.
- Pandemic (2022) - Programmer, PC. An adventure game about a virus that attacked humanity.
- World of Spiretopia (2021) - Lead Programmer, Android. A shooter tower-builder game.
- Space Invader Reborn (2021) - Whole Role, PC. A mini space shooter game — simple and to the point: kill as many ships as possible and rack up the highest score you can.
- Heroes of Indonesia (2020) - Whole Role, Android. A turn-based card game where the target is to beat the last boss while building your deck by buying new cards.
- Garda Gerdy (2020) - Programmer, Android. A side-scrolling endless runner set across multiple real locations in Yogyakarta where Garda Gerdy stores are located.
- Biovolve: Battle Arena (2019) - Programmer, PC. An online multiplayer battle game set in a post-apocalyptic theme, where players fight as mutated living things on an earth ravaged by pollution.
- Elemental Battle (2019) - Programmer, Browser (localhost). A remade casual HTML5 game — guess who wins between two elements based on the tutorial.
- Arrow Shooter Game (2019) - Programmer, Browser (localhost). A remade casual HTML5 game — shoot the enemy until it's gone while keeping it away from the green bar below.
- Knife Hit Remake (2019) - Programmer, Browser (localhost). A remade casual HTML5 game — hit the enemy until the arrow count drops to zero.
- Better Knife Hit (2019) - Programmer, Browser (localhost). Same core idea as Knife Hit — hit the enemy until the arrow count drops to zero — but built from an entirely different, physics-free codebase.
- Prototype Kinect & VR Rhythm Game (2019) - Programmer, VR / Kinect. A rhythm game prototype created to explore and learn how VR and Kinect input work.
- Login (2018) - Programmer, PC. Tells the story of a schoolboy trapped inside a game world full of bullying, mixing puzzle, fighting, and adventure mechanics.
- Prototype Air-Strike Game (2018) - Whole Role, PC. A shooter prototype telling the story of an alien invasion of Earth, featuring the ability to transform into objects found on Earth.
- Bingo Board (2018) - Whole Role, PC. Not a game, but a quiz-competition application (Lomba Cerdas Cermat) built for FACTION #3 at Sanata Dharma University.
- Artefact Defender (2017) - Programmer, PC. A tower defense game where players must guard ancient artefacts from demons trying to steal and destroy them.
- Prototype E-Magazine (2017) - Whole Role, PC. Not a game — a self-directed attempt at building an interactive e-magazine application.
- Bob's Adventure (2017) - Programmer, PC. A 2D side-scrolling platform adventure game — and the very first game I ever made.
- Career Mastery (2017) - Whole Role, Physical Board Game. A physical strategy board game I designed and built myself: make your way to clear your quest while others try to stop you.
